

Jewish Community Center of Dutchess County

110 S. Grand Avenue
Poughkeepsie, NY 12603

Dear Friends,

It is my pleasure to make you aware of life saving screenings in our community.

Where: Poughkeepsie - Jewish Community Center of Dutchess County

When: Monday, August 16, 2010

Pre-registration is required. Call 1-800-690-6414

Over 400,000 people have participated in Life Line Screening Radiology's ultrasound tests for stroke caused by carotid artery disease, abdominal aortic aneurysms and other vascular diseases. Cardiovascular disease is the #1 cause of death in the United States of both men and women – and a leading cause of permanent disability.

Consider the facts*:

- **4 out of 5 stroke victims had no apparent warning signs**
- **80% of strokes can be prevented**

You may think that your physician would order these screenings if they were necessary. However, insurance companies typically will not pay for screenings unless a person has suffered symptoms. Unfortunately, **for so many people, the first sign of a stroke is a stroke.** That is why having a screening is so important to keep you and your loved ones healthy and independent.

I encourage you to talk to your physician about Life Line Screening Radiology. I am confident that he or she will agree with the hospitals that have partnered with Life Line Screening Radiology and suggest that you participate in this health event.

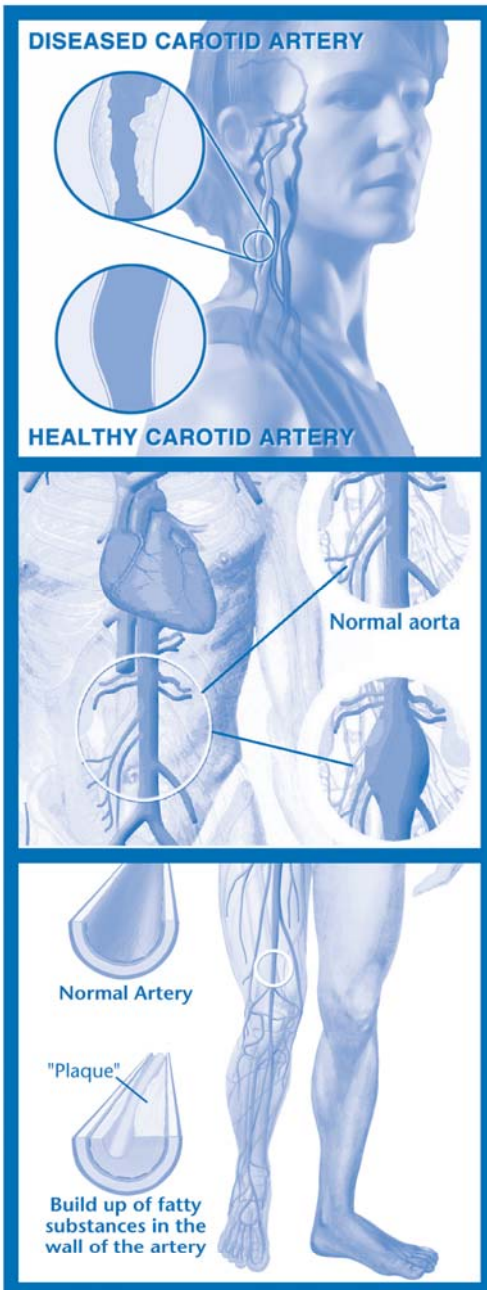

Please take a minute to read this information about these quick and painless tests. Life Line Screening Radiology is coming to our neighborhood for one day only and appointments are limited, so please call **1-800-690-6414**.

Wishing you the best of health,

Friends in Health

P.S. Tell your friends, neighbors and loved ones about these life saving screenings and encourage them to call **1-800-690-6414** today. You may just save a life.

We Can Help You Avoid a Stroke

Trusted by Hospitals

Life Line Screening Radiology has partnered with hospitals and physicians to screen hundreds of thousands of participants. Why? Because the ultrasound screenings that we offer can help save your life.

1 Stroke/Carotid Artery Screening

Ultrasound evaluation of the carotid arteries that screens for buildup of fatty plaque – the leading cause of strokes.

2 Heart Rhythm Screening (Atrial Fibrillation)

A quick and easy test using EKG electrodes placed on the arms and legs to identify the presence or absence of an irregular heartbeat at the time of the screening.

3 Abdominal Aortic Aneurysm Screening

Ultrasound is used to screen for the presence of an aneurysm in the abdominal aorta that could lead to a ruptured aortic artery.

4 Peripheral Arterial Disease Screening

Evaluates for peripheral arterial disease (plaque buildup) in the lower extremities. It is 4-5 times more likely you will die from heart disease if you have peripheral arterial disease.

5 Osteoporosis Screening

An ultrasound measurement of the heel bone to determine abnormal bone mass density. Osteoporosis is painless and silent in its early stages.

***Stroke, Vascular Disease & Heart Rhythm Package;
all 4 tests for only \$139
Add an osteoporosis screening for \$10 more;
all 5 tests for \$149 (\$66 savings!)***

Screening results are provided to you within 21 days.

Insurance Note: At the present time, Life Line Screening Radiology does not participate in the Medicare program and the cost of these screening services is not reimbursable by Medicare. Life Line Screening Radiology does not file insurance claims. In New Jersey and New Hampshire, ultrasound screening services are provided by Life Line Screening Radiology, LLC, L.M. Sheppard, M.D., 1-609-883-8688. In New York, ultrasound screening services are provided by Life Line Screening Radiology, LLC, L.M. Sheppard, M.D., 1-212-679-5943.
